

2000 Belmont Metals

*Bringing a Century of Innovation
to the New Millennium*

Pure metals and alloys. Standard and custom shapes.

Working
toward the

Future by Building on the Past

A New
Century

Our Past is the Prologue to Another Century of Accomplishment

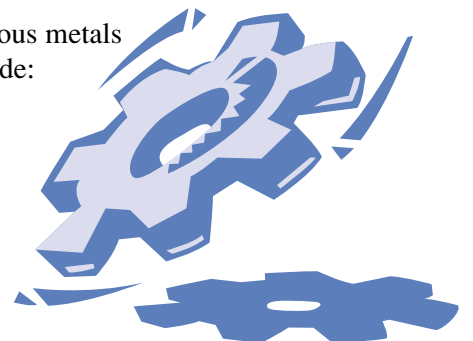

Looking ahead to another hundred years, much of what we imagine today will be routine tomorrow. Vacations on the moon...tiny nano robots injected into the body's bloodstream to fight and prevent infections...hovercraft that respond to voice commands to take you where you want to go. What you don't need to imagine is Belmont's commitment to anticipate tomorrow's needs and meet customer demands into the next century—just as we have done for the past century. Supplying customized alloys for the intercontinental jets that whisk you to a European holiday...solders and metals for key automotive and electronic applications...things that over a hundred years ago people were only just beginning to imagine.

We've been providing cutting-edge metals and alloys essential to industrial development and advancement since 1896, when George Henning started a metals trading business out of his home on Belmont Avenue in Brooklyn. Back then, the "horseless carriage" had just been invented...the Wright Brothers were known primarily as bicycle repairmen...Marconi patented his idea for "wireless" communications. Belmont supplied many of the critical metal components that made these and many other innovations commonplace.

An Industry Leader in Any Century

Today, Belmont offers a greater variety of non ferrous metals than any other U.S. manufacturer. Product groups include:

- Casting Alloys
- Master Alloys
- Degasifiers
- Deoxidizers
- Hardeners
- Solders
- Brazing Alloys
- Miter-Al-Braze Rod
- Binder Alloys
- Low Melt Alloys
- Cathodic Anodes
- Plating Anodes
- Wire Specialties
- Chemical Use Metals

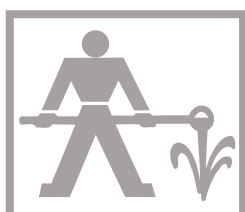

Our metals and alloys include Aluminum, Beryllium, Bismuth, Brass, Bronze, Copper, Indium, Lead, Magnesium, Nickel, Pewter, Tin, Zinc, and a host of others in standard and customized shapes.

After more than a hundred years of experience, Belmont is well positioned to move forward into the next century. Whatever the page of the calendar, our goal remains the same: **to provide you with the highest quality products to meet your specific requirements, delivered quickly and at reasonable prices.**

As we move forward into the year 2000 and beyond, Belmont stands out as one of the select group of companies that has been active in three centuries. Perhaps even more unique, the business remains in the hands of the founding family. We are still headquartered at our original location in Brooklyn, and are still committed to helping you "Put the Mettle into Metals."

Working Towards the Future

As we move into the next millennium, we draw upon our experience to meet the challenges and expectations of our customers. It may be a new millennium; but Belmont will continue to focus on the quality products and customer service we've always been known for—and will continue to be—in yet another new century!
